

Patologia sistemului genital masculin.

Patologia sistemului genital feminin

Tema: Patologia sistemului genital masculin. Patologia sistemului genital feminine.

I. Micropreparate :

Nº 227. Adenocarcinom de prostată pe fond de hiperplazie glandulară. (colorație H-E.). Indicații:

1. Focarul de țesut canceros cu proliferarea unor structuri glandulare atipice.
2. Țesutul prostatic adiacent cu semne de hiperplazie:
 - a. glande dilatate chistic de formă neregulată;
 - b. țesut fibro-muscular.

Nº 214. Seminom testicular. (colorație H-E.). Indicații:

1. Celule tumorale de formă poligonală cu citoplasma clară.
2. Infiltrate limfoide în fasciculele fibroconjunctive.

Nº 108. Sarcina tubură (colorație H-E.). Indicații:

1. Viloziități coriale.
2. Țesut decidual.
3. Peretele trompei uterine.

Nº 111. Coriocarcinom uterin (colorație H-E.). Indicații:

1. Celule epiteliale ale citotrofoblastului cu citoplasma clară (celule Langhans).
2. Celule atipice sincițiale cu hiper Cromia nucleilor.
3. Focare hemoragice.

II. Macropreparate :

Nº 90. Hiperplazia nodulară a prostatei cu hipertrofia peretelui vezicii urinare.

Nº 105. Carcinom de corp uterin.

Nº 106. Carcinom de col uterin.

Nº 108. Sarcină tubară.

Nº 111. Chist ovarian dermoid.

Hiperplazie nodulară a prostatei.

Adenocarcinom de prostată pe fond de hiperplazie glandulară.

№ 227. Adenocarcinom de prostată pe fond de hiperplazie glandulară. (colorație H-E).

**Seminom
testicular.**

№ 214. Seminom testicular. (colorație H-E).

Carcinom testicular embrional. (pattern solid).

Solid tumor with gelatinous surface

A

**Tumora de sac Yolk
(sac vitelin) testiculară.
(pattern microchistic).**

Yolk sac tumor: microcystic pattern

B

Hemorrhagic tumor

A

Coriocarcinom testicular.

1. Citotrofoblast.
2. Sincitiotrofoblast.

©WebPathology.com

Heterogeneous or variegated tumor due to different elements

A

Mature teratoma

Teratom testicular matur.

B

Mature teratoma

More fleshy appearing than mature teratoma

C

Immature teratoma

Teratom testicular imatur.

Primitive neuroectodermal tissue

Primitive mesenchyme

D

Immature teratoma

Hidrocel ↑↑

← Chist epididimar

Carcinom invaziv de glandă mamară.

a

b

Carcinom mamar invaziv:

a – ductal;

b – lobular.

Adenomioza peretelui uterin.

Hiperplazie simplă și complexă a endometrului.

**Carcinom endometrial,
varianta endometrioidă.**

Leiomiom uterin.

Leiomyosarcom.

Neoplazie intraepitelială cervicală (koilocitoză). HSIL (CIN 2,3).

Cancer de col uterin.
(*histologic – carcinom scuamos
cu keratinizare*).

Chist endometriotic ovarian.
(ciocolațiu)

Chist ovarian dermoid.

Sarcină ectopică tubară.

№108. Sarcină tubură (colorație H-E).

Molă hidatiformă.

Gross appearance of invasive mole. A hemorrhagic mass has permeated half of the thickness of the myometrial wall.

Molă disecantă.

METRIC 1

Choriocarcinoma

Dissemination to lung

Choriocarcinom cu diseminare în plămâni.

cm 1 1

Choriocarcinom gestațional.

№ 111. Coriocarcinom uterin (colorație H-E).
